Technical information

# Tentipi® Classic

## Wooden-pole Nordic tipis

Our classic Nordic tipis resonate with stylish people everywhere because of their difference, their atmosphere and their link with a simpler, bygone age. They are based on the traditional dwellings of the sami people and the teepees of north American Indians.

### A different way to entertain medium-sized groups

It's a design we've brought up to date sympathetically with 21st century technology – keeping the most elemental features of the original. You can still relax round a blazing log fire, encircled by solid, wooden poles. This is what makes the Tentipi® design so comforting, companionable and appealing.

These Classic Nordic tipis are ideal for festivals, club functions, private garden parties, barbecues, or business events, sporting occasions and tourist centres. Relive the outdoor lifestyle in an authentic nomadic setting.

### Materials

**Fabric** – thick, tough, breathable, water-repellent cotton/ polyester mix. It's far more durable than simple, cheap cotton fabric. But it still lets the light glow warmly through and it breathes to ensure a pleasant atmosphere and less condensation. At the bottom edge the canvas is reinforced with 50 cm of tear-resistant polyamide. Flame-retardant fabric is available as a Health and Safety option.

**Poles** – these are timber poles of world-beating quality. They are immensely strong, yet very manageable during erection. This is because they are made from the best possible material – extremely late-maturing, de-barked spruce that is lighter than pine. For example the poles for Cirrus 72 are made from trees of up to 150 years old. The annual rings are often so tight they almost touch. Consequently, the poles not only have huge load-bearing strength, this density also makes them highly durable and rot-resistant.

### Construction

You can put up Classic, wooden-pole Nordic tipis quickly without a ladder. When the canvas is tied to its poles you simply sweep it around the framework!

Draughts are prevented by the unique Tentipi® door construction.

The ventilator cap is weighted to keep it from blowing up, and you can adjust it from ground level.

Tent peg catches have steel ring reinforcements.

Tent model	Granit 14	Granit 21	Granit 40
<b>Description</b>	Use the Granit 14 in all seasons, enjoy being different, relax and eat round a log fire in comfort. And one person can erect it in 15 minutes. You do not need a ladder or special equipment.	Whatever the weather you'll all be snug and warm round a blazing log fire. And, despite its size, one person can erect it in 25 minutes. You do not need a ladder or special equipment.	The Granit 40 will accommodate up to 68 people sitting, 40 at tables – or up to 30 sleeping. It is easy to transport by car and trailer, and easy to put up in half an hour by two people without a ladder or special equipment.
<b>Fabric</b>	<b>Flame-retardant (FR) fabric</b> – this is your option for countries where the authorities demand flame-retardant canvas. <b>Standard fabric</b> – this is available for smaller Nordic tipis, and also for larger Nordic tipis in non-professional use. Provided that you use the Nordic tipi correctly there is no risk of fire.		<b>Standard fabric only</b> If you want flame-retardant fabric, we recommend the Cirrus 40 FR of the same size as Granit 40 (see next page).

# Tentipi® Event

## Large Nordic tipis

Atmospheric, spacious, flexible and, above all, different. These are Nordic tipis with many charming traditional features that have been modernised in capacities that suit everything from family celebrations to events for hundreds. The patented fixing system makes these Nordic tipis both stable and easy to erect – whatever the size.

### Fun, festivity, fellowship – for family occasions or thousand-seater events.

See one of these Nordic tipis and you're smiling straight away. Step inside and you know why. Fun, festivity and good fellowship are what these spacious tents are all about. Immediately you're enjoying yourself, chatting, mingling, relaxed.

Everyone loves the atmosphere, the space, the flexibility and, above all, the difference. They love the historical link with the classic tents of the nomads that makes every occasion so much more imaginative and enjoyable; an event with flair.

Using an Event Nordic tipi at a trade fair, for example, gives you the edge in attracting customer interest. They're more practical, too – easier to erect and cost-effective compared with solid constructions.

They can host weddings, anniversaries, stylish garden parties – and numbers are no problem. You can seat up to 128 at tables in the Stratus or join several Stratus together to seat hundreds.

The ambience is unique, evocative, memorable – and great fun.

This is because they are made from the best possible material – late-maturing, de-barked spruce that is lighter than pine. The poles not only have huge load-bearing strength, they are also highly durable and rot-resistant.

### Construction

The exclusive fixing system makes Straus and Cirrus much stronger than Classic Nordic tipis - in fact it is one of the strongest tent structures available. Stratus has additional poles to support the brim when used in the hat configuration. Special equipment and training is available to allow many Stratus to be linked together to create an array of inspiring structures.

Tent model	Stratus 72	Cirrus 40	Cirrus 72	Nimbus 16
<b>Description</b>	<p>The Stratus 72, is our original and widely popular Nordic tipi for all kinds of activities, both summer and winter.</p> <p>It is designed so that the canvas can be raised to form a brim, like a giant hat, that gives you free air circulation and shade during hot days.</p> <p>This means you have even more covered space for dining, entertaining or exhibiting. With the brim fully or partly lifted, all the activities and merchandise are revealed, inviting guests and visitors to come and join in.</p> <p>This extra space can also have walls for total weather protection.</p>	<p>For maximum flexibility, the side opposite the doorway can be rolled up to make an opening 1.8 m high and 4 m wide.</p> <p>This simplifies throughput for large numbers of exhibition visitors; it provides an excellent view for guests at a party; it can be the starting point for a skiing competition; it also means you can connect it to other Nordic tipis for a large event. For example, you can easily use the Cirrus 40 as a kitchen to serve several connected Stratus 72 Nordic tipis. Or you can use it as an entrance/greeting lobby, a cloakroom, storeroom, lounge, break-out area, etc. It seats 40 at tables.</p> <p>It is so manageable – it has a patented assembly system, with pre-mounted pole connectors. This means that two people can erect a Cirrus 40 in less than an hour without any machines.</p>	<p>Cirrus 72 is our first giant Nordic tipi with the patented connectors to ensure strength and simplify erection.</p> <p>Cirrus 72 has become the first choice for so many activities all year round because of its stable structure, its reminder of our ancient roots, its manageability, its spaciousness and the opportunity to have an open fire.</p> <p>A full tourist busload can be served comfortably at tables inside a Cirrus 72.</p> <p>The extra door fulfils the need of a reserve exit or a back door. It has two similar doors on opposite sides.</p> <p>It is so manageable – it has a patented assembly system, with pre-mounted pole connectors. This means that two people can erect a Cirrus 72 in less than two hours, without any machines.</p> <p>Also, the simpler design reduces the cost compared with Stratus 72.</p>	<p>Nimbus 16 is original, it's fun, it's distinctive.</p> <p>In other words, it's everything you want to be when you are entertaining friends, holding a road show for business or exhibiting at a county fair or trade event.</p> <p>These are all typical applications for the innovative Nimbus 16 – whether you leave it open all round or use the optional windbreak.</p> <p>In the garden, it's a cool gazebo for summer luncheon parties. On the road it's a trade stand that stands out – and gives you so many creative marketing options.</p> <p>Whatever you want to do, Nimbus 16 will be your shelter in a way that gives you pleasure and gets you noticed.</p>

# Event Accessories

**Bamse max <sup>1</sup>**

Rustic and sturdy fireplace styled for use in our Event Nordic tipis or other outdoor use. Very practical while also providing the right atmosphere — a must for successful get-togethers.

Timber frame, dovetailed at corners. Swing-arm for coffee pot or Muurikka grill hob. The fire box is made of strong sheet metal which protects the timber frame. It only needs a thin layer of gravel and so the fireplace is relatively easy to move. Delivered assembled.

120x150x80 cm.  
Fire box: 32 kg. Frame: 35 kg.

**Bamse fold-up table <sup>2</sup>**

Up to three can be mounted on the large Bamse fireplace. Hinges allow tables to be folded up or down as required.

**Bamse mini**

Smaller model of Bamse max made for the Granit 21, Granit 40 and Cirrus 40 Nordic tipis.

80x80x63 cm.  
Total weight: 35 kg.

**Finnmark fireplace**

Even complicated meals are easy to make using the Finnmark fireplace. Three swing arms (A) for pots and pans can be easily moved over the fire for cooking or warming. Muurikka 100 can be placed on the three corner posts (B). Muurikka 48 and 58 can be placed on the special swing-arm ring (C) and positioned over the fire even when Muurikka 100 is being used. Fish can be flame grilled on the provided planks (D).

The natural convection (E) gives better combustion, less smoke and reduces fuel consumption. The sloped bottom (F) keeps the wood centred. Ashes fall into the removable ash-box (G) under the fireplace.

Packed 83x83x28 cm. 32 kg.

Complete set shown in picture (coffee pots and grill hob not included).

**Collapsible bench and table**

Furniture built for function and atmosphere. Its simple but attractive design adds rustic enjoyment. Folds down in seconds and uses little storage space. Stable enough for permanent use yet flexible if you need to move often. Made of sturdy pine that doesn't twist or warp.

You can store enough furniture to fill a whole Cirrus 72 in a pile the size of one table, about 1.6 m high. This furniture is more stable than non-collapsible equivalents. The surface is oiled.  
Table size: 200x70 cm.

**Reindeer hide deluxe**

Tanned reindeer hide with silicone coating on back to withstand wet. Odourless.

**Stratus walls**

Walls for the Stratus 72 when in open position, with sloping sides that match the Nordic tipi. The walls are hung on to the brim cross-poles (extra accessory) all around the edge of the open brim. The result is a much larger room which is sheltered from the wind.

Nine walls, in any combination, are needed to completely enclose a Stratus 72 Nordic tipi.

**Nimbus windbreak**

Optional windbreak to go round half the Nimbus 16.
